EDUCATION

Masters in Computer Engineering Chosun University

03/2021 - 02/2023

3.60/4.00

Thesis

- Aggregated multiscale self supervised denoising

B.Sc. in Electronics and Communication Engineering Khulna University of Engineering & Technology

12/2014 - 03/2019

3.01/4.00

Thesis

- Classification of Chest X-Ray images to detect pneumonia using Deep Residual Network

WORK EXPERIENCE

Graduate Research Assistant Computer Vision Lab, Chosun University

04/2021 - 02/2023

Kwangju, Republic of Korea

Tasks

- Developed and implemented advanced face detection and recognition algorithms for various projects.
- Designed and developed code for self-supervised image denoising techniques.
- Troubleshooting and refining recent work on segmentation-based deep learning methods and results for different methods for the co-authored papers.
- Created neural network models for image-to-image conversion.

System Engineer Grameenphone Ltd

07/2019 - 06/2020

Tasks

- Conducted 24/7 alarm surveillance of network elements and systems.
- Escalated, following up, and reporting alarms until resolved.
- Performed stability checks based on system benchmark KPIs.
- Provided terminal-based support during planned activity execution in the network and ensuring successful completion.
- Enhanced the experience for content providers.

Contact: Rinto Barua - +8801711083627

SKILLS

Deep Learning

Image Processing

Image to Image model

Convolution based deep learning

Face recognition model

Face detection model

PERSONAL PROJECTS

FRVT 1:1 face recognition project (04/2021 - Present)

- Developed a custom face recognition model based on Residual Connection.

Portable printer prototype (09/2017 - 01/2018)

- It's developed using microprocessor. Which can use any image input and draw that image on a paper.

DC Power supply (09/2016 - 12/2016)

- It's a low cost dc voltage supplier from 0-20 Volts
